

Introduction of SOLUTHERM™ – A Global Leader in Glycol-Based Thermal Solutions

We are excited to announce the launch of **SOLUTHERM™**, a new global brand that consolidates the expertise and legacy of *KOSTChill* and *RECOFREEZE* into a single, unified name. SOLUTHERM™ is set to become a leading brand in the thermal management industry, delivering innovative glycol-based solutions and services to customers across a diverse range of sectors worldwide.

A Global Leader in Thermal Management

SOLUTHERM™ is a part of Rechem®, a global powerhouse in fluid formulation and manufacturing, with over 70 years of experience with cutting-edge technology and offering high-performance thermal management solutions. With an established presence in over **50 countries** and **7 world-class R&D facilities**, SOLUTHERM™ is poised to serve the evolving needs of industries where precision thermal control is paramount.

Manufactured in North America, SOLUTHERM™ solutions meet rigorous quality and safety standards while driving technological innovation. Whether you're dealing with large-scale cooling for industrial systems or specialized applications requiring exact standards, SOLUTHERM™ delivers a comprehensive range of products designed to address diverse needs.

Expertly Formulated Glycol-Based Solutions

SOLUTHERM™ is a trusted partner in the design and supply of **turnkey glycol-based solutions** for industries including HVAC, food and beverage, and data center cooling. The brand offers a variety of high-quality formulations that can be tailored to meet specific customer needs.

- A key product highlight is the **food-grade glycol solutions**, which are NSF registered and meet **CFIA (Canadian Food Inspection Agency)** standards, ensuring safe use in food and beverage processing systems. These formulations are also **GRAS (Generally Recognized as Safe)** by the **FDA**, providing customers with the peace of mind that they are using products that meet the highest levels of safety and compliance.
- In the **HVAC sector**, SOLUTHERM™ offers **aluminum-safe glycol formulations**, which are essential for preventing corrosion in heat transfer systems, ensuring long-lasting performance.
- For **data centers**, SOLUTHERM™ specializes in **direct-liquid-cooling (DLC)** solutions, a cutting-edge technology that helps optimize energy efficiency and cooling for high-performance computing environments.

Sustainability and Eco-Responsibility

At SOLUTHERM™, sustainability is a key focus. The brand offers a range of **Eco-Responsible products**. These bio-based products are designed to reduce environmental impact while still delivering superior thermal management performance. By using environmentally friendly formulations, SOLUTHERM™ not only meets customer expectations for high-quality solutions but also promotes sustainability.

SOLUTHERM™ Services – Tailored to Your Needs

In addition to its advanced products, SOLUTHERM™ offers an array of services designed to meet the specific needs of its customers. **SOLUTHERM™ Services** ensures that every customer receives comprehensive support throughout the lifecycle of their thermal management systems.

Our services include:

- **Formulation Selection:** SOLUTHERM™'s team of experts will help you select the right glycol-based formulation specifically tailored to your application, optimizing performance and system longevity.
- **In-Use Testing & Remediation:** SOLUTHERM™ provides in-use testing to ensure your systems are running efficiently and offers remediation services to address any challenges.
- **Industry-Specific Technical Guidance:** Whether you are in HVAC, data centers, or food processing, our team provides detailed technical guidance, ensuring the right solutions for every industry.
- **Tailored Trainings & Sessions:** We offer custom training sessions to ensure that your team is well-equipped to handle the intricacies of glycol-based thermal management solutions.
- **Educational Materials:** SOLUTHERM™ delivers valuable educational content through webinars, newsletters, video capsules, whitepapers, and more, helping customers stay informed about industry trends and best practices.

A Legacy of Trust, Innovation, and Quality

As Colin Dille, PhD, Senior Vice President of R&D at Recochem, noted, “**NSF approvals and industry specifications are core to the credibility of our products. But beyond that, we provide a range of services that are tailored to meet customer needs. We offer in-use testing and remediation and are available to provide industry-specific technical guidance every step of the way.**”

With the strength of Recochem's legacy and innovation behind us, **SOLUTHERM™** is more than just a name – it's a promise of **uncompromising quality, innovation, and customer satisfaction.**

For more information on SOLUTHERM™ and to explore our comprehensive range of glycol-based solutions and services, please visit www.solutherm.com.

The launch of SOLUTHERM™ marks an exciting new chapter in the evolution of glycol-based thermal management. As industries increasingly demand precision, efficiency, and sustainability, SOLUTHERM™ is committed to providing innovative solutions that meet those needs, helping businesses succeed in a rapidly changing world.

Recochem's brands include: **Prestone, Rain-X ClearView***, **OEM, HD Expert, Shell***, **Engine Ice, Turbo Power, H2Blu, Adam's Polishes, POR15, Solvable, Diggers, WinterProof, Absolute Zero** and **SOLUTHERM**. Backed by deep consumer research and R&D, we're set to grow while upholding our core values of exceptional service and product quality. With 1,700 employees, 7 innovation centers, and 20 factories across 50+ countries, we deliver excellence and premium value as a reliable partner to meet consumer needs.
